EEL 3701C: DIGITAL LOGIC AND COMPUTER SYSTEMS

http://mil.ufl.edu/3701/  @eel3701  UF’s Canvas

INSTRUCTOR
Dr. Eric M. Schwartz  MAEB 321  392-2541  ems@ufl.edu  Office Hours: Wed: 12:50pm, Fri 1:55pm

LECTURES
Tues 4th & Thur 4th-5th (10:40-11:30am, 10:40am-12:35pm) in LAR 310
Tues 7th & Thur 7th-8th (1:55-2:45pm, 1:55-3:50pm) in LAR 310

LAB SECTIONS (NEB 248)

REQUIRED TEXTBOOK (Share, Borrow, Buy, or Rent one of the below. See website for more info)

RECOMMENDED REFERENCE TEXTBOOK

COURSE OBJECTIVES (ABET Design Content 50%) [Lab fee: $91.39]
To learn to: perform elementary manipulations of Boolean algebraic equations; simplify logic expressions; design combinational and sequential circuits; use a digital design and simulation package, use a hardware description language (HDL), analyze binary storage device behavior and applications, and to study the fundamentals of microprocessor architecture, including assembly language programming and the design of basic components of a microprocessor.

CLASS ATTENDANCE AND BEHAVIOR
Class attendance is mandatory; all classes are important. Class roll will be taken. There will be pop (unannounced) quizzes. A missed class/quiz cannot be made up. (See Course Requirements below for policy on missed quizzes.)

Turn off all cell phones, beepers, laptop sound effects, and other noise making devices before entering our classroom. If a noise-making device goes off during class, I reserve the right to lower your course grade. If a noise-making device goes off during an exam, your will lose a significant number of points on this exam.

TA OFFICE HOURS
You may go to any TA available (in NEB 248 if no lab; else NEB 222), not just the one teaching your lab section. The instructor will hold office hours (posted above and on our web page) or by appointment. You are encouraged to use e-mail to communicate with the instructors and TAs. TA(s) will also hold afternoon help sessions: TBD.

REQUIRED HARDWARE

- A special *USB Blaster programming cable* (from Altera) is required for this course. The price for this cable is $60 plus tax. Until they run out, the cable is available at the UF bookstore, go to the counter in the computer area to request one. This device is also used in at least one other course (EEL 4744). More information about this required device will be provided in class. You will also need your own laptop PC (see link) for use in lab and possibly during the exams.
- The *Digilent Analog Discovery (DAD) board* is required for this course (and many other ECE courses). Board ordering information can be found at this link: [http://tinyurl.com/discov-ufl](http://tinyurl.com/discov-ufl). The discount price for students is $159 (no tax for Florida addresses), with a shipping price of $11-$13 for slowest shipping. Check your 3701 tweets (or email) to find the code necessary to get the *Analog Parts Kit* (with list price of $49.99) for free with the purchase of a DAD! If you are an EE student, I also recommend that you buy the NI Multisim & Ultiboard software (for analog circuit design and simulation) for $9.95. The UF bookstore MAY have the Analog Discovery (???$132) and the BNC Adapter (???$21.32) for those that want to use financial aid or want it right away.

COURSE REQUIREMENTS (IMPORTANT!!!)

- Perform all laboratory experiments. A grade of 65% or better in Lab is *required* in order to obtain a passing grade. Your lowest lab (not including lab 8) will be dropped. But use this drop wisely, i.e., do *not* just skip a lab since all labs are important and your next missed lab may be unavoidable. If you need to miss a single lab, it’s ok; you can *not* make up the missed lab. (You should do this lab on your own. If necessary, you may visit a TA during an office hour for help.) If you have a valid reason for missing this lab, get documentation for your first missed lab and hold on to it. If you miss a second lab, you must show the professor (not the TA) written documentation for BOTH your first and your second missed labs. This documentation should be official and from a doctor, judge, etc., so that a make-up can be arranged. You must notify the professor prior to your scheduled second missed lab or as soon as possible after your second missed lab.
  1. Labs *must* be done at scheduled times.
  2. Students *must* be prepared to demo their lab when they enter. Students will be randomly selected for their demonstration times during their lab period.
  3. An average lab grade of *65% or higher* is required to be *eligible* to pass the class!
  4. Class attendance is mandatory. Roll will be taken. Each missed class will cost 0.5 points (out of 100) from your overall course total.
    - *No excuses accepted, but two free drops.*
  5. Do all homework assignments and turn them in through Canvas before the time that they are due.
    - *Late homework will not be accepted.*
  6. A quiz can happen at any time, during any class, i.e., quizzes are generally not announced ahead of time. You should therefore not miss class.
    - *Missed quizzes cannot be made up.*
  7. Take 3 during-term exams. (Note that the there is NO final exam at the scheduled time.)
    - *No makeup exams will be given except for a medically documented incapacity or family emergency.*

STUDENTS WITH DISABILITIES

Students requesting classroom, laboratory or exam accommodations must first register with the Dean of Students Office. The Dean of Students Office will provide documentation to the student who must then provide this documentation to the instructor when requesting accommodation. For optional consideration, you must see the professor during the first week of classes.

UF COUNSELING SERVICES

Resources are available on-campus for students having personal problems or lacking clear career and academic goals. The resources include:

- University Counseling & Wellness Center, [http://www.counseling.ufl.edu](http://www.counseling.ufl.edu), 3190 Radio Road, (352) 392-1575.
- SHCC mental Health, Student Health Care Center, [http://shcc.ufl.edu](http://shcc.ufl.edu), Infirmary Building, 1 Fletcher Drive, 392-1161.
- Center for Sexual Assault/Abuse Recovery and Education (CARE), Student Health Care Center, 392-1161.
- Career Resource Center, [http://www.crc.ufl.edu](http://www.crc.ufl.edu), Reitz Union, 392-1601, career development assistance and counseling.

STUDENT PRIVACY

There are federal laws protecting your privacy with regards to grades earned in courses and on individual assignments.

SOFTWARE USE
All faculty, staff, and student of the University are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against University policies and rules, disciplinary action will be taken as appropriate. We, the members of the University of Florida community, pledge to uphold ourselves and our peers to the highest standards of honesty and integrity.

TECHNOLOGY
The use of cell phones and every other technology device is strictly prohibited during exams. All use of an electronic devices during an exam will be considered a violation of the student honor code (i.e., cheating). See the Cheating section below for the minimum penalties that are incurred for all cases of cheating in our course. Laptop computer and tablets are welcome in class as long as they are used for class-related work. Surfing the web, checking email, making Facebook posts, etc., is strictly prohibited (if distracting to others) and will result in course grade deductions.

COMMUNICATION
You are responsible for checking announcements and course-related postings on the class website and Canvas. Twitter is utilized for announcements, so you are also responsible for getting this information (either with a Twitter account or with software that creates and email or text message from tweets). You are also responsible for checking your UF email daily.

EXTRA CREDIT
Extra credit is sometimes offered during class (or on the web, by tweet, or by email). The amount of extra credit given is at the discretion of the faculty member unless specifically stated with the extra credit opportunity.

HOMEWORK AND EXAM SOLUTIONS
Solutions to homework will be made available on our class web site. Practice exams (some old ones with solutions) are also posted.

COURSE GRADE DETERMINATION
I have found that attendance is directly correlated to grades. Therefore, attendance is required, but is NOT worth positive points. Each missed class results in a deduction of 0.5 points (out of 100) from your overall course total. There are no excuses for missed classes, but two classes can be missed without penalty.

Midterm Exams (2@20%) 40%
Laboratory 30%*  (Lab values vary, i.e. it could count as 1/3 a lab, a single lab, a double lab, etc.)
Homework/Quizzes 4% (5-10 homework and 0-5 quizzes)
End-term Exam 26%  (comprehensive; 90% or better results in 5% grade bonus, e.g., 86% ⇒ 91%)
Total 100%**

* A grade of 65% or better in Lab is required in order to obtain a passing grade. Your lowest lab (not including lab 8) will be dropped. But use this drop wisely, i.e., do not just skip a lab since all labs are important and your next missed lab may be unavoidable. If you need to miss a single lab, it’s ok; you can not make up the missed lab. (You should do this lab on your own.) If you have a valid reason for missing this lab, get documentation for your first missed lab and hold on to it. If you miss a second lab, you must show the professor (not the TA) written documentation for BOTH your first and your second missed lab. This documentation should be official, i.e., from a doctor, judge, etc., so that a make-up can be arranged. You must notify the professor prior to your scheduled second missed lab or as soon as possible after your second missed lab.

** Attendance is required, but is NOT worth positive points. Each missed class results in a deduction of 0.5 points (out of 100) from your overall course total. There are no excuses for missed classes, but two classes can be missed without penalty.

Note: All grading percentages are subject to change at professor’s discretion. Students will be notified of any changes.

GRADING POLICY
UF grades are often distributed according to the following rough distribution: A: 10% B: 35% C: 45% D&E: 10%. This usually works out to mean that if you make class average you will earn close to a “C+” or “B-”. If you score 10 percent above the class average, you will probably earn a “B.” If you score 20 percent above class average, you will probably earn an “A.” This is not a contract on grading. Rather, this information serves to provide you a rough understanding of your academic standing at any time during the semester. Grades are periodically posted on the class web site. It is your responsibility to check your grades regularly since mistakes often happen when dealing with a large number of students and TAs. All grades are final one week after posting. After curving exams as needed, course grades are assigned using the 60 (D), 70 (C), 80 (B), and 90 (A) cuts. [86. 6 ⇒ 89. 9 (A-)], 83. 3 ⇒ 86. 6 (B+), 76. 6 ⇒ 79. 9 (B-), 73. 3 ⇒ 76. 6 (C+), 66. 6 ⇒ 69. 9 (C-), 63. 3 ⇒ 66. 6 (D+), 0<59.9 (E)].

Part of your grade on exams, labs, homework, quizzes, etc. is based not only on solving the problem you are presented with, but the manner in which you solve it. For example, there is a difference between two designs that meet the given specifications, but one is an elegant, modular 3-element solution, while the other is an obfuscated 5-element design that also meets the specifications but would be difficult to extend later. Just as your future employer would value the latter design less than the first, so will I in grading your assignments.
The UF grading policies for assigning grade points can be found on the following undergraduate catalog web page: https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx.

**HOMEWORK GRADING**

Homework is submitted through Canvas by the assigned deadline. Unless otherwise specified, a single PDF document should be submitted for each homework. (Sometimes additional files will be requested.) Scans are acceptable, but must be compressed and in a single document. Fast Scanner (available for Android and iPhone) is a cell phone app that works well. Missed homework cannot be made up, but your lowest homework (or quiz) is dropped. Since homework is not returned and is graded only for effort, students should compare their solutions to the posted solutions. Late homework is not accepted.

**IN-CLASS QUIZ GRADING**

In-class quizzes will cover material previously covered in assigned readings, homework, class or lab. Quizzes may happen during any class; they are not generally announced beforehand. Missed quizzes cannot be made up, but your lowest quiz (or homework) is dropped. Therefore, missing a single quiz will not hurt your grade. See the Course Requirements section above for the policy for missed quizzes.

**MULTIMEDIA CLASS/AUDIENCE NOTES**

Audience notes are normally available from the class web site every week or so for the subsequent week or more of classes. The notes consist of PDF versions of the class PowerPoint slides with some space for note taking. These notes are not required but are highly recommended. Check the class web site for information on exactly when the notes are available. For optimal performance, read the notes and examples for a class before that class and bring the printed class notes and examples to class to augment the printed material with your own notes. Notes will be removed shortly after they are covered in class.

**EXAM RE-GRADE POLICY**

If you believe an error has been made on an exam score you must make a written request to the instructor explaining where the misgrading or error occurred. This request must be submitted immediately at the end of the class in which the exam is returned. If you do resubmit an exam, however, the instructor reserves the right to scrutinize and grade the entire exam more closely. This definitely places your current score at risk. Consequently, it is not advisable to resubmit an exam for correction unless a blatant error, such as a miscalculation of total points, has been made. You must make it clear what writing you added to the exam (by clear indication, e.g., use a different color pen or pencil) after it was returned to you.

**ACADEMIC HONESTY**

All students admitted to the University of Florida have signed a statement of academic honesty committing them to be honest in all academic work and understanding that failure to comply with this commitment will result in disciplinary action. This statement is a reminder to uphold your obligation as a student at the University of Florida and to be honest in all work submitted and exams taken in this class and all others.

**CHEATING**

The following pledge is required for all work submitted for credit by University of Florida students: “On my honor, I have neither given nor received unauthorized aid in doing this assignment.” Cheating will not be tolerated. We will actively search for cheaters. If you are caught, there will be no negotiations. You will fail the course and get reported to the honor court. There are no excuses and no exceptions. You may talk to other students about homework and lab assignments, but the final work must be your own. If you are caught cheating on any assignment (homework, lab, quiz, or exam, etc.), the smallest penalty possible is failure for the course. During a recent semester several students were caught with partly copied lab assignments. All of these guilty students earned an “E” in the course. A meeting with the instructor (and, possibly, the UF honor court) will determine additional penalties, none of which are desirable or pleasant (i.e., cheating in this course will result in a failing grade in the course, initiation of honor court charges, and possibly expulsion from the university). If you know someone is cheating, it is your responsibility to report it. We have and will continue to prosecute cheaters by turning them over to the office of Student Judicial Affairs. For more information about cheating, the UF Honor code, and the consequences of academic dishonesty, please refer to https://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/ and https://www.dso.ufl.edu/sccr/process/incident-report/.
WORKING TOGETHER
You are encouraged to work with other students on homework assignments (absolutely prohibited on labs) in a professional manner. Each person in the group should attempt to solve all problems independently and only then discuss the results with one's partner(s) to correct errors and resolve differences. Copying your partner's work without a serious attempt on your part constitutes cheating and should not be permitted by your partner(s). Matching your solution to your partner's, however, is acceptable, if, after independent study and work you are convinced your partner's solution is correct. All solutions should reflect your style of problem solving, even those you have changed to match your partner's solution. In other words, verbatim copying or simple paraphrasing of your partner's solution is not an acceptable form of cooperative study. Your name and your partner's name(s) must be on your homework. You may not copy and submit old or new posted solutions as if they were your own.

You must do independent work on labs. Although you may consult with other students, TAs, or Professors, you must do independent work. Consulting means “seeking opinions or advice” not getting working programs or designs, understanding them, and then modifying them to make them your own. The latter constitutes cheating (see above section). Working side-by-side to construct a program or design in a group constitutes cheating. (Solving labs are good practice for solving quizzes and exams, which are also not group activities.)

LABORATORY GRADING
You will not be admitted to the lab without a Summary document, as described in the Lab Rules and Policies. The Summary document and other files also must be submitted through Canvas before the start of your lab.

Each circuit diagram, VHDL file, and assembly language program must have your name (computer) printed at the top. ALL simulations should be clearly annotated using Quartus annotations. Quartus files should be sent in a Quartus archive file. Grading emphasis will be placed upon your producing well documented, well-structured design circuitry that realizes the functional requirements specified by the lab handout and the lab instructor. The remaining portion of your grade will result from observations by your lab instructor on such matters as your understanding of the lab, your lab techniques, your pre-lab preparation, your lab results and your cooperation and compliance with the rules. Having your design perform properly does not guarantee a grade of 100, but makes a 100 grade possible. Lab designs and/or software that are similar and/or identical to other student’s work constitute cheating (see above) and will be reported to the professor for further discipline (and will result in failing the course, honor court charges, or expulsion). There will be a quiz at the beginning of most labs (worth up to 40% of your total lab score). If you are late for a lab, you will get a zero for the quiz.

RULES OF CONDUCT IN THE LABORATORY
1. Lab safety is rule #1. Play close attention to TA instructions about lab safety, which will occur during your first lab.
2. No food, drinks, or unprofessional behavior is allowed in the lab.
3. Students work individually on each lab project.
4. It is the student's responsibility to return all equipment and clean her/his work area before leaving the lab.
5. Students must attend labs during their assigned time. If you cannot attend your normal lab, this lab will be your single (free) dropped lab.
6. Students must come prepared to the Lab. No student will be admitted to the lab without the pre-lab work already submitted through Canvas and required printouts in hand. Your files must be submitted through Canvas before the start of your lab.
7. You must show up within 30 minutes of the lab starting time for check-in or you will not be admitted. If you are more than 10 minutes late, you will get a zero for the lab quiz.
8. Quizzes might take as long as 1.5 hour (but could be shorter). Quizzes will be graded on a quinary scale of 0, 1, 2, 3, or 4. This will translate into values of 0, 10%, 20%, 30%, or 40%, respectively to account for up to 40% of the lab grade. Quizzes will cover information from the pre-lab material and previous labs and course work.
9. Labs are precisely 2.75 hours (not 3 hours) long. You will be given no extra time.
10. Students must be prepared to demo their lab when they enter. Students will be randomly selected for their demonstration times during their lab period.
11. The last 30 minutes of the lab is a time for student check-off and grading only, i.e., no questions for the TA.

LABORATORY ATTENDANCE
Laboratory attendance during scheduled times is mandatory. Documented personal or family emergency will be accepted as an excuse for absence for a second missed lab if documentation for a first missed lab is also provided. In such cases, consult your instructor (not your TA) about a make-up lab as soon as possible. See Course Requirements for more details. Students should make serious attempts on all labs. Grades less than 50% may be interpreted as not a serious attempt and may be scaled to 0.
You will not officially makeup your first missed lab. You should do this missed lab at home (or, if necessary, during a TA office hour) to be sure you understand the required material.

If you cannot finish the lab during the allotted time, you will lose at least 10% to 40% off your final score. You are expected to finish the labs on time. The most successful students generally get their labs to work at home before their lab begins.
